

RASKIA FINISHERS CLEANERS STD 100 EL VE

- Vertical action tensioning**
- Self-lubricating**
- Resistant to cuts**
- Excellent on worn belts**
- Reduced dimensions**

Finishing cleaners with elastomer scraping elements.

For placement to a section after the point of detachment of the belt from the drive roll, on the return section of the tape.

The design of these scraping elements is the result of thirty years of applied experience acquired by Barra Project International Srl: the multiple sector scraper formation ensures for the cleaning of the whole carpet surface to compensate for possible irregularities in contact surface.
Suitable and recommended for use with worn belts.

Technical specifications:

- /RASKIA elastomer scraping elements
- blade length: 100 mm

Types of tension system:

- ◆ **M → mechanical**
manual tensioning
double tension station
- ◆ **P → pneumatic**
double tension station
suitable for uses where it is difficult to access the cleaner for re-tensioning
easily connectible to the compressed air network
- ◆ **PA → self-powered pneumatic**
double tension station
suitable for uses where it is difficult to access the cleaner for re-tensioning
having a tank axle for compressed air (Pmax = 8bar)
easily connected to the compressed air network or can easily be filled using a battery powered portable compressor or through a hand pump if necessary
